Statistics & Reports - Immunization Coverage Levels

Trends in Immunizations

The immunization data is obtained through the annual Immunization Data Report. The Immunization Data Report is a self-report survey that each school is required to complete and submit to the Arizona Department of Health Services Immunization Office by November 15th each year per Arizona Administrative Code R9-6-707. It assesses the coverage and exemption data from the following grades: Child care/Preschool; Kindergarten; and 6th grade.

Deadly Delays

The nation's newborn screening programs depend on speed and science to save babies from rare diseases. But thousands of hospitals fall short, deadly delays are ignored and failures are hidden from public view — while babies and their families suffer.

Published Nov. 16, 2013

Delays at hospitals across country

Lack of weekend lab hours adds to delay, putting babies at risk

*Because it
sometimes really
isn't a few bad
apples*

Because we want to report on what officials and institutions do, not what they say

One by one, nearly all the state psychiatric hospitals were boarded up or bulldozed, but Massachusetts leaders broke their promise to replace them with something better — or much of anything at all. The failed mental health care system has led to a public safety crisis, including scores of murders by disturbed people, police shootings, and embattled institutions from courts to hospitals confronting a tidal wave of mentally ill people.

Original reporting with data

(Once known as “computer-assisted reporting”)

What computers do

- Store stuff
- Give you back stuff you stored
- Sort, count and match
- Repeat your instructions over and over
- Help you with some math

What computers don't do

- Ask questions
- Get ideas
- Think
- Feel
- See
- Understand right from wrong

(They also don't complain when you ask too many questions)

Welcome to the party. The New York City block party.

For some, however, the idea of a block party is a New York City relic.

"I think they are dying," Elander Williams said at a block party in Bedford-Stuyvesant. "We have very little participation. The kids are growing up and the new generation are not interested in having block parties."

In the last 10 years the number of permits the city has issued for block parties has been steadily decreasing. There were 537 fewer permitted block parties this year between June 1 and Sept. 1, than in 2009, when 1,848 permits were issued during that same period. That could be because more people are having block parties without the city's permission or because fewer blocks are throwing them.

Methodology

We used [NYC Open Data](#) to find the time and place of all permits for block parties in New York City. After mapping the locations for the permits filed for this summer, we sent 20 photographers out across the five boroughs over three weekends in August. They filed from a total of 65 block parties.

Our historical data went back 10 years, and we narrowed those numbers to look only at block parties held between June 1 and Sept. 1 of each year.

THE WAY WAY BACK

Comparing outcomes using government records to find disparities

Documenting racial profiling in police work is devilishly difficult, because a multitude of factors — including elevated violent crime rates in many black neighborhoods — makes it hard to tease out evidence of bias from other influences. But an analysis by The New York Times of tens of thousands of traffic stops and years of arrest data in this racially mixed city of 280,000 uncovered wide racial differences in measure after measure of police conduct.

The Disproportionate Risks of Driving While Black

An examination of traffic stops and arrests in Greensboro, N.C., uncovered wide racial differences in measure after measure of police conduct.

- Public postings on social media
- Drivers’ records, insurance, parking tickets and more courts
- Graduation, transcript
- Tuition payments, credit scores
-

Public?

IN PUBLIC / non-government

Confidential / Non-governmental

Available under public record laws / government

Secret / government

Government?

FOIA IS

- A law created to ensure public access to government-held documents and other artifacts of government activities
- A formal process to obtain records

FOIA IS NOT

- The right to “information” or answers to questions
- Efficient
- A well understood or consistently administered law

Court records are *almost* public and require no request , except when you want databases of court records (one of the most useful databases around)

- Lawsuits (state civil)
- Felony prosecutions (state criminal)
- Divorce (family)
- Wills (probate)
- Traffic infractions (city or county court)

**Immigration offenses and lawsuits against the federal government, for example, are handled in federal court, not state courts.*

Public Records – Overview

Search ... 

Arizona's Public Records Law

Arizona law requires all officers and public bodies to maintain records reasonably necessary to provide an accurate accounting of their official activities and of any government funded activities.

Records are defined as books, papers, maps, photographs, or other documentary materials regardless of physical form or characteristics, made or received by an governmental agency in pursuance of law or in connection with the transaction of public business and preserved by the agency or its legitimate successor as evidence of the organization, functions, policies, decisions, procedures, operations, or other activities of government. Examples of public records and other matters include calendars, reports, legal memoranda, policies and procedures, accident reports, training videos and materials, tape recordings of meetings where there are no written minutes, personnel records, case files, and data bases.

"Arizona law requires all officers and public bodies to maintain records reasonably necessary to provide an accurate accounting of their official activities and of any government funded activities."

<http://www.azoca.gov/open-meeting-and-public-records-law/overview/>

The biggest impediment to the effective use of FOIA among journalists is a widespread but wrong default position that records belong to the Government and not to the public. This position turns FOIA upside down. Instead of the Government convincing the public that certain information must be kept secret, in practice the public must convince officials that it should be released.

Paraphrased from prepared testimony to the U.S. Senate Judiciary Committee,
"Ensuring transparency in the digital age", Sarah Cohen, March 15, 2011.

Est. Release Date: June 2018 » Audit Scope ([PDF](#)) ([HTML](#))

SCOPE AND METHODOLOGY

The Joint Legislative Audit Committee (Audit Committee) directed the California State Auditor to conduct an audit of California's oversight of nursing facilities. During this audit, we were to examine the method by which the State sets Medi-Cal rates for nursing facilities and the degree to which the facilities' quality of care affects Medi-Cal payments. The Audit Committee also asked us to evaluate the use of related-party entities and transactions by nursing facilities, including those facilities owned by or related to Brilus. The analysis that the Audit Committee approved contains 10 objectives. We list these objectives and the methods we used to address them in Table 13.

Retention Schedules

General Retention Schedules

Any record series listed as permanent on a general retention schedule or that has been designated as historically significant should be transferred to the State Archives when the agency or political subdivision no longer wishes to maintain those records. You can reach the State Archives at 602-926-3720 or 800-228-4710 to discuss the transfer of the records.

[Permanent and Historical Records](#)

General Schedules supersede all existing custom schedules with the following exception: the custom schedule retention period is longer than the general schedule retention period.

California State Forms Directory

Under the leadership of the Government Operations Agency & the Governor, the state is undertaking an effort to streamline the number of forms it uses and find other efficiencies in forms management. This page provides citizens and employees of the State of California a common access point to state forms. Managed by the Department of General Services (DGS), the Directory contains links to electronic versions of relevant and current forms, providing citizens another resource to more easily conduct business with the State of California.

Information:

For questions about a specific form, please contact the [forms coordinator](#) for the agency that authors that form. The DGS Forms Management Center (FMC) does its best to keep its links up-to-date. If, however, you encounter a dead or misdirected link or errors, please contact [FMC staff](#).

If you choose to save a form to your computer, you can use the [Get Adobe Acrobat Reader](#) to open and view the form.

The screenshot shows the data.world platform interface. At the top, there's a navigation bar with links for Product, Pricing, Roles, Resources, Company, Community, Login, and a green profile icon. Below the navigation is a banner for "MUCKROCK" with links for News, Projects, Requests, Assignments, and a search bar. The main content area features a large image of people in a lecture hall. Overlaid on this image is the text "File, track, and share public records requests." To the left, a sidebar has the text "Data Kill Time" and "See the..." partially visible. The main search results page shows a Google search bar with the query "coronavirus covid-19". Below it are filters for Last updated, Download format, Usage rights, Topic, and Free. A message says "100+ datasets found". Two datasets are listed: one from the CDC titled "Coronavirus Disease 2019 (COVID-19)" with a link to www.cdc.gov, and another from the World Health Organization titled "WHO Coronavirus disease (COVID-19) situation reports" with a link to www.who.int. Both datasets have a PDF icon next to them. To the right, there's a summary for the CDC dataset: "Dataset provided by Centers for Disease Control and Prevention" and "Description: These datasets will be updated regularly at noon Mondays through Fridays. Numbers close out at...".
